### PROFILE

---

AI Developer with hands-on experience in building scalable backend systems, AI-powered applications, and automation tools. Strong experience in Python, Alteryx, debugging, and system design. Proven ability to work independently, collaborate with cross-functional teams, and deliver high-quality solutions. Experienced in requirements analysis, unit testing and documentation.

### TECHNICAL SKILLS

---

|                                              |                                                    |
|----------------------------------------------|----------------------------------------------------|
| <b>Languages:</b> Python, JavaScript         | <b>Backend:</b> REST APIs, Microservices           |
| <b>Frontend:</b> HTML, CSS, React.js         | <b>Cloud:</b> AWS (EC2, S3, Lambda)                |
| <b>DevOps:</b> Git, Docker, CI/CD            | <b>AI / ML:</b> LangChain, RAG, GenAI, OCR, OpenCV |
| <b>Data Analytics:</b> Alteryx Designer      | <b>Databases:</b> MongoDB, MySQL, PostgreSQL       |
| <b>Automation:</b> BeautifulSoup, Playwright | <b>Core CS:</b> DSA                                |

### EXPERIENCE

---

|                                                         |                     |
|---------------------------------------------------------|---------------------|
| <b>ProPlus Data Prospect Intelligence</b> , Pune, India | Jan 2026 – Present  |
| Jr. AI Developer (Full-time)                            |                     |
| AI Intern                                               | Jun 2025 - Dec 2025 |

- Developed scalable Python backend services and REST APIs, contributing to production deployments and system reliability
- Built AI-powered automation and data extraction solutions while collaborating with cross-functional teams and clients
- Led end-to-end development including requirements analysis, debugging, and testing

|                                                                                                                                                     |                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>GenAI Intern</b> <a href="#">Demo</a>                                                                                                            | Jun 2024 - Jul 2024 |
| Ernst & Young, Pune, India                                                                                                                          |                     |
| Developed a Python-based eKYC system using OCR and face detection, built Flask APIs with frontend integration, and created technical documentation. |                     |

### PROJECTS

---

|                                                                                                                                            |                      |
|--------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <a href="#">Github Link</a>                                                                                                                |                      |
| <b>Data Processing Pipeline</b>                                                                                                            | March 2026 - Present |
| End-to-end data analytics workflow in Alteryx for data ingestion, transformation, and reporting.                                           |                      |
| <b>Email Marketing System</b> <a href="#">Demo</a>                                                                                         | Dec 2025 - Present   |
| Developed an automated email marketing system for campaign management, user segmentation, and bulk email delivery with analytics tracking. |                      |
| <b>AI Study Helper</b> <a href="#">GitHub Repository</a>                                                                                   | Nov 2023 - Apr 2024  |
| RAG-based study assistant generating questions and answers.                                                                                |                      |

### CERTIFICATIONS

---

- Alteryx Designer Core Certified
- Machine Learning Essentials - Master Core ML Concepts — Udemy
- Ultimate AWS Certified Generative AI Developer Professional — Udemy

### EDUCATION

---

|                                                                                |             |
|--------------------------------------------------------------------------------|-------------|
| <b>B.Sc. (Computer Science)</b> , Modern College of Arts, Commerce and Science | 2022 – 2025 |
| <b>HSC (Science)</b> , Late Bhairomal Tanwani Junior College                   | 2020 – 2021 |
| <b>SSC Board</b> , Baswantrao Patil English School                             | 2018 – 2019 |
